

Part 2 – User to complete:

Name of user: Matthias Cuntz

Address: Helmholtz Centre for Environmental Research – UFZ, Permoserstr. 15, 04318 Leipzig, Germany

Email: matthias.cuntz@ufz.de

Telephone number: +49 341 235 1071

(Please note that the above details may be posted on the **list of CABLE users** page and used by CSIRO in accordance with the Software Licence Agreement.)

NCI login (if you already have a NCI user account): 

Please select one of the following:

(a) ☒ I am requesting an individual CABLE licence

(b) ☐ I am requesting a User account under my Organisation's CABLE licence

If you have selected (b), please state which Organisation: Helmholtz Centre for Environmental Research – UFZ, Leipzig, Germany

☐ Student

☒ Employee

☐ Other (please state)

If you are a student, please provide supervisor contact information (these would not appear in the **list of users** page). Your supervisor's signature is also required to indicate that they approve your registration.

Name of supervisor:

Position in organisation:

Address:

Email:

From where or whom did you hear about the CABLE model? Vanessa Haverd

Please provide a short description of your intended use of CABLE and anticipated intended research results (including proposed publication time frames, if any).

I am a longterm collaborator of Vanessa Haverd. We have developed together the model Soil-Litter-ISO (SLI), which is now coupled to CABLE. We have already closed the water and energy balance in an earlier version of Cable that was used in Vanessa's Australia work. We are currently implementing cold processes in SLI. I have been doing extensive bug fixes on Cable so that it runs with several compilers on different platforms giving the same results. These fixes were give to Vanessa and Lars Nieradzik. Because Vanessa is on maternity leave now, I fear that these fixes might not get passed to Cable repository. I would also like to do a few Cable runs on the Northern hemisphere for a talk at AGU.

I have read and will comply with the Software Licence Agreement and the Guidelines for users and developers of CABLE:
