From where or whom did you hear about the CABLE model?

• Dr. Joshua B. Fisher (Scientist at JPL)

Please provide a short description of your intended use of CABLE and anticipated intended research results (including proposed publication time frames, if any).

We are developing a framework named ModelFarm at Jet Propulsion Lab where we seek
to run different land surface models using same set of input data. This framework utilizes
super-computing facility available at JPL and helps provide scientific observations to the
modelling community.
