From where or whom did you hear about the CABLE model?

I worked with CABLE during my post-doc term at CSIRO O&A

Please provide a short description of your intended use of CABLE and anticipated intended research results (including proposed publication time frames, if any).

I have further extended CABLE's parallelisation as well as developed the fire model BLAZE which needs to be implemented in CABLE's official version.
A publication is envisaged for later this year on the wildfires in Australia.
For the future a close collaboration with the CBGC team at CSIRO's O&A and myself is planned, including future updates to BLAZE.
